**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**DETAILED ACTION**

1. This Office action is in response to Applicant's amendment, filed on 3/22/2004.
2. Claims 1-18 are pending.

***Claim Rejections - 35 USC § 103***

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 1, 2, 6-10, and 13-18 are rejected under 35 U.S.C. 103 (a) as being unpatentable over Tal (U.S. Pat. No. 6,535,856) in view of Nozue et al. (U.S. pat. No. 5,890,189).

As per claims 1, 2, 6-10, and 13-18 Tal substantially discloses a database for dynamically regulating and enforcing open account payments (which equivalent to Applicant's claimed invention wherein said creating a multi-application terminal), comprising:

a memory management unit for separating said application in said memory, thereby permitting said payments (see., abstract, col 3, lines 22-59, memory management unit or database 34.n, and figs 2 and 3);

Art Unit: 3621

a processor for executing one or more applications (see., abstract, col 3, lines 22-59, processing module 24). It is to be noted that Tal fails to explicitly detail the claimed feature wherein said management unit operable to assign a protected region. However, Nozue discloses a management unit that can provide memory protection information that is assigned in advance to each region (see., fig 23, col 14, lines 1-53, col 23, lines 20-35). Accordingly, it would have been obvious to a person of ordinary skill in the art at the time the invention was made to modify the database of Tal by including the limitation detailed above as taught by Nozue because this would monitor a buyer who has paid a seller and the seller has failed to deliver the goods or service properly.

As per claim 2, Tal discloses the claimed limitations wherein said memory management unit terminates an application or shuts down said terminal if it is determined that said application is accessing memory outside its assigned region (see., abstract, col 2, lines 33-58, specifically wherein said seller and buyers who have defaulted on payment terms, it is obvious to realize buyers who have defaulted on payment terms will have their services terminate or shut down).

5. Claims 3-5, and 11-12 are rejected under 35 U.S.C. 103 (a) as being unpatentable over Tal (U.S. Pat. No. 6,535,856) and Nozue et al (U.S. Pat. No. 5,890,189) in view of Ishiguro, Ginya et al. (U.S. pat. No. 5,446,796).

As per claims 3-5, and 11-12 discloses the claimed limitations as stated in claim 1 above. It is to be noted that Tal and Nozue fail to explicitly disclose a public key and

authenticating application. However, Ishiguro, Ginya discloses a master public key, card secret keys, and a card identification or authentication (see., abstract). Therefore, it would have been obvious to a person of ordinary skill in the art at the time the invention was made to modify the teachings of Tal and Nozue by including the limitation detailed above as taught by Ishiguro, Ginya because this would provide a secure memory.

#### RESPONSE TO ARGUMENTS

6. Applicant's arguments filed on 3/22/2004 have been fully considered but they are moot in view of new ground (s) of rejection.
